

The didactic material for the doctoral course “Prosody: structures, interfaces, contact”, such as sound files and preparatory readings, will be uploaded on a dedicated website hosted by the UGent didactic platform UFora (<https://ufora.ugent.be/d21/home/172416>).

As a non-UGent staff member/student, you need to create their UFora account via this link: <https://elosp.ugent.be/welcome>. In this way, I will be able to add you to the participants/organizers of the course and give you access the course material and to the internal communications.
